## PROFESSIONAL SUMMARY

Full Stack Developer and QA with experience in React, TypeScript, Node.js and .NET, REST APIs, SQL Server and MySQL, QA testing, Agile methodologies, Azure DevOps and Git. IT Intern at Coopeguanacaste with a web module deployed to production. Systems Engineering student (UNA, expected graduation Nov 2026) and 1st place winner at the UNA Cybersecurity Hackathon 2026.

## EDUCATION

**Bachelor's Degree in Systems Engineering (in progress)** | National University of Costa Rica (UNA) Jan 2023 – Nov 2026  
**Diploma in Computer Applications Programming** | National University of Costa Rica (UNA) Jan 2023 – Jul 2025

## PROFESSIONAL EXPERIENCE

**Intern – IT Customer Experience, QA and Full Stack Development** Jul 2026 – Present

*Coopeguanacaste R.L. – IT Department*

- Developed and deployed to production the FaunaReport web module with React: layout, Navbar, text components, and backend integration through HTTP requests to the incidents endpoint.
- Fixed vulnerabilities and implemented TanStack to protect public credentials, following audit guidelines.
- Implemented email notifications in MAM: created database fields, configured templates and variables, and optimized existing alerts.
- Executed QA tests on CoopeVirtual and validated the new E-commerce platform, detecting issues early and producing validation reports.
- Gathered requirements for CoopeWeb procedures, compared items against the database (analysis in Excel), and produced reports in NetSuite.
- Worked with Agile methodologies, Azure DevOps for task management, and Git for version control.

**Full Stack Developer – Freelance** Mar 2025 – Jun 2026

*Cámara de Ganaderos – Web Information and Administration System*

- Developed a full stack web application with React, Node.js and MySQL to digitize administrative and budgeting processes, including a module to manage actual and projected income and expenses.
- Implemented authentication, authorization and protected routes with REST APIs, plus dynamic forms with validations.
- Managed development with Agile methodologies, Azure DevOps, and version control with Git/GitHub.

**Academic Project – Municipal Management System** Mar 2025 – Nov 2025

*React, TypeScript, .NET and SQL Server*

- Developed a municipal management web system (taxpayers, properties and procedures) with a React and TypeScript interface.
- Implemented a REST API in .NET with CRUD operations, validations and business rules.
- Designed the SQL Server database with relationships, stored procedures and audit triggers.
- Used Git/GitHub for version control and collaborative work.

## TECHNICAL SKILLS & LANGUAGES

**Development:** React, JavaScript, TypeScript, HTML, CSS, Tailwind, TanStack, Node.js, .NET, C#, C++, Flutter, Dart.

**Backend & data:** REST APIs, SignalR, RabbitMQ, SQL Server, MySQL, PostgreSQL, Oracle APEX.

**QA & tools:** QA testing, Postman, TestFlight, Mailtrap, Git, GitHub, Azure DevOps, Agile methodologies (Agile/Scrum), NetSuite, Power BI.

**Languages:** Spanish (native) | English (intermediate – reading comprehension and basic conversational skills).

## CERTIFICATIONS & ACTIVITIES

PM4R Practitioner Jun 2025  
Scrum Fundamentals Certified Apr 2025  
From Data to Decisions: Master Power BI + AI (40 h), National University Aug 2026  
Intermediate English Level, Academia Europea Nov 2025  
1st Place – UNA Cybersecurity Hackathon (teamwork) 2026  
Student Assistant – Systems Engineering Coordination, UNA Mar 2025 – Present
